

## REMARKS

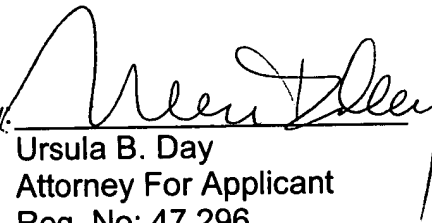

The instant continuation application is being filed with a specification which for simplicity's sake now incorporates all prior amendments previously entered including a new title. Applicant states that no new matter has been introduced thereby.

Furthermore, the current continuation application contains claims directed to the rotational vibration damping action as well as to the damper.

The application was discussed with the Examiner prior to being filed as a continuation application. Applicant reserves the right to file a further preliminary amendment to propose revised claims.

When the Examiner takes this application up for action, he is requested to take the foregoing into account.

The Commissioner is hereby authorized to charge fees which may be required, or credit any overpayment to Deposit Account No. 06-0502.
